

Protecting People. Reducing Risk.™

Who We Are

Strong Pharmaceutical Services, a division of Strong Environmental, Inc. (a Stericycle company), is the leading provider of destruction services to the pharmaceutical industry. Our experienced professionals manage and ensure the appropriate witnessed destruction of DEA controlled substances, as well as proper disposition of RCRA hazardous and non-hazardous finished goods and manufacturing wastes. When we take control of waste materials at your shipping dock, they become our full responsibility.

Waste Technologies

Non-Hazardous Consumer Products

Disposal of Consumer and Commodity Products

One of the more important challenges facing manufacturers today is finding cost-effective and secure disposition options for consumer product waste. Careful consideration must be given to the selection of specific methods. Numerous factors weigh into this decision, including:

- Necessity of assured/witnessed product destruction to eliminate re-entry to marketplace
- Corporate and local community directives to reduce land disposal
- Elimination of future liabilities associated with land disposal

Manufacturers and distributors of solid and liquid consumer products which should be considered for alternative disposition include:

- Health care products
- Creams and lotions
- Shampoos
- OTC pharmaceuticals
- Toiletries
- Cosmetics
- Household chemicals
- Other commodity waste

Depending on the product, there are many different alternative disposition technologies available. These options include:

- Non-hazardous incineration
- Recycle/reuse
- Off-site wastewater treatment
- Aerosol recycling
- Ingredient capture for reuse

Manufacturers and distributors of consumer products may require disposition of off-spec, expired, or returned products, such as:

- Powders, sprays, liquids and gels
- Residue from cosmetic manufacturing
- Aerosol products (with or without residue)
- Plastics and other polymers
- Process water, alcohol or solvent

Our goal is to provide disposal options for your waste that meets your needs from all perspectives: waste reduction, cost minimization, corporate liability and regulatory mandates. Our state-of-the-art facilities provide "BAT" (best available technology) and regulatory compliant disposition choices for you through a single source—Strong.
